

# **SRI VIGNARAJAYA NAMA INDUSTRIES**

## **ABOUT US**

We SVN was established on 1989. we excel in providing precision quality of textile spares for weaving machinery, ensuring optimal performance and long durability for your production needs. Our machine shop features with cutting-edge technology and expert craftsmen, delivering precision accuracy engineering solutions tailored to your specifications. Moreover, we have a die-cast aluminum foundry, offering high-quality components with superior strength and durability. Trust us for all your weaving, warping and other manufacturing requirements.

## **EXCEPTIONAL SERVICE**

- Efficiency enhancement
- Quality assurance
- Customizations options
- Technical support
- Timely delivery
- Cost optimization

## **VISION**

To establish SVN as a brand of Textile Industry business throughout the world

## **MISSION**

Establish a culture of continuous improvement, customer-centricity, and cross-functional collaboration to enhance product quality and satisfaction with on time delivery.

## **FACILITIES**

- Aluminum foundry to produce die-cast aluminum flanges
- Manufacturing facility with high precision & accuracy machineries
- Computerized Dynamic balancing machines
- Automated slotting and gear hobbing machines
- Quick dry Painting booths to enhance product quality and to reduce corrosion

## **PRODUCTS TO SERVE**

- Warper beams
- Weaver beams
- Cloth rolls
- Drive hubs
- Drive gears
- Drive adaptors
- Batching rollers
- Wip rollers
- Bearings
- Other Industrial rollers etc...

## WARPER BEAMS

Warper beams are suitable for KARL MAYER, JUPITER, BENNINGER, PRASHANT WEST POINT, AMRITLAKSHMI driven direct warping. Also suitable for high-speed warping machines.

Beams are Produced with gravity die-cast aluminum flanges from 710mm to 1100mm with ASTM graded Mild steel barrels, drive hubs with a SG cast iron. Beams are dynamically balanced according to G 6.3.

## WEAVERS BEAMS

Weavers beams are suitable for TSUDAKOMA, TOYOTA, PICANOL, SULZER, SOMET, DORNIER, VAMATEX, SMIT and other type of Airjet and Rapier weaving machines with single and twin sections.

Beams are Produced with gravity die-cast aluminum flanges from 710mm to 1100mm with ASTM graded Mild steel barrels, locknuts and drive gear with a SG cast iron. Beams are dynamically balanced according to G 6.3.

## **CLOTH ROLLS**

SVN manufactures Cloth Rolls for All Looms, made of ASTM grade Steel tubes and Aluminum Tubes. Whereas, steel cloth rolls are spray painted and aluminum cloth rolls are surface treated.
